

Wheat Free/Gluten Free pasta is perfect for those on a special diet, but also for those seeking a wholesome alternative pasta.

Mrs. Leeper's Pasta pasta products offer gourmet quality and appearance, at affordable competitive prices. This wheat free/gluten free product line offers full flavor as well as a perfect texture. Available in 13 varieties of shapes and flavors, this pasta cooks up beautifully! Unlike many rice and corn based pastas, this will *not* gum up or turn mushy.

Although designed to be enjoyed by all, Mrs. Leeper's is especially useful to members of a large sector of our population diagnosed with Celiac disease. A Celiac is a person with intolerance to wheat products. Ingesting gliadin, a portion of wheat gluten or similar proteins activates the Celiac disease. This results in damage to the villi lining the part of the small intestine where most of the nutrients in our food is absorbed. Celiac disease is often overlooked or misdiagnosed because of the diverse and confusing ways it manifests itself. Dietary control has been found to be the most successful way of managing this disease.

Wheat free/gluten free labeling allows the Celiac tremendous peace of mind. They must always be aware not only of items listing the offending grains, but often products include ingredients that have wheat content.

Diet modification, with the assistance of high quality manufacturing and labeling, can enable a celiac to enjoy a variety of products without health risk. Mrs. Leeper's has made this commitment to help enrich the lives of celiacs and help them lead full, problem-free lives. [Download celiac disease statement](#)
