

Celiac Diet

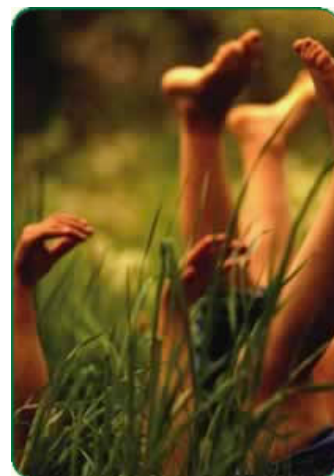

Gluten Free Products

It's not easy to find gluten free products in your local food store. That's why we make a range of breakfast foods to cater to people with gluten restricted diets -- delicious certified organic breakfast cereals, cookies and all-natural waffles sold under the Nature's Path, EnviroKidz® or LifeStream® brands. These foods are made at our plants on the west coast. These facilities are not wheat-free but we do adhere to strict quality assurance procedures to prevent production line contamination and ensure good manufacturing practices.

Manufacturing Process

We at Nature's Path are very proud of our many excellent gluten free products. In order to ensure that our products are safe for those with celiac disease we adhere to the following:

1. We manufacture our gluten free cereals together isolating them from any products that contain gluten.
2. All processing equipment is thoroughly cleaned before a run of gluten free cereals.
3. To further ensure that our lines are free of any gluten containing grains, a specified portion -- at the beginning of the run -- is not utilized in gluten free cereals.

Organic is good for you and the environment

There are many types of organisms living in the soil, making up the soil food web. These... [READ MORE](#)
